

Quick presentation RME-Zirocco truck-built road dryer

Facts and advantages:

- Jet dryer turbin from well proven supplier with more than 50 units delivered.
- The turbin runs on diesel so no open-flame LPG installations needed.
- Lower investment and higher productivity than the traditional LPG system.
- RME was the first company to make this fully operational from truck.
- All operations such as start/stop and up/down and left/right is done from inside the cabin. This improves safety and productivity.
- Once installed the RME-Zirocco road dryer is easy to de-mount and re-mount. The truck can then be used for other purposes as well.
- The Telamatics system connected to the dryer gives you GPS system as well as running time and report system.
- Air-flow with output of about 100 m³/min temperatures up to 550 degrees.
- Drying width up to 45 cm.
- Can also be rented from RME!
